

Industrial Air Cooler Condenser For Heavy Duty Cooling In Extreme Conditions

Basic Information

Place of Origin: CHINABrand Name: DMCertification: ISO9001

Minimum Order
1

Quantity:

• Model Number:

• Price: \$200~\$100000

Packaging Details: Wooden caseDelivery Time: 30 Work days

• Payment Terms: T/T;L/C

• Supply Ability: 1000000pcs/year

Product Specification

• Condition: New

Cooling Capacity: Depends On Size And Material

• Application: Refrigeration Parts

Corrosion Resistance: Salt Spray Test Up To 1000 Hours
Material: Copper, Aluminum, Stainless Steel

• Tube Diameter: 5mm, 7mm, 9.52mm, 12.7mm, 15.88mm

DM-LNQ-0002

• Certifications: ISO9001, ISO14001, CE, UL

• Tube Thickness: 0.3mm - 1.2mm

Highlight: Industrial Air Cooler Condenser,

Heavy Duty Air Cooler Condenser, ISO9001 Air Cooling Condenser

Industrial Air Cooler Condenser for Heavy Duty Cooling in Extreme Environments

Product Description:

The product boasts of a reasonable structure and excellent interchangeability, making it a versatile option for various applications. The unit can also be equipped with various types of compressors, depending on the specific requirements.

Customers who have varying needs can also choose between window fin and honeycomb fin types. Both provide unique benefits that cater to different applications, ensuring maximum functionality and customer satisfaction.

The unit undergoes rigorous air tightness testing, with a 3.0MPa air pressure, before leaving the factory. With this testing, the product guarantees high quality air tightness for long-term use.

The film spacing is also adjustable between 1.7mm and 3.0mm to meet the demands of different environmental conditions and situations, ensuring optimal performance and convenience.

You can customize the unit further by opting for different types of condensing fans, flexibly configuring the unit according to your specific needs and requirements.

Features:

Quiet Operation. Our products are designed with noise reduction in mind. You won't have to worry about any loud, disruptive noises that can distract you from your work or conversations with others.

Seamless Connection. Our products are equipped with the latest technology to ensure a fast and efficient connection. You won't have to worry about any lag or interruption when using our devices.

Easy Installation. Our products are designed with ease of use in mind. The installation process is simple and can be completed with minimal effort, allowing you to start using your new devices in no time.

Beautiful and Elegant Placement of Circuit Devices. We understand that aesthetics are important, which is why we make sure that our circuit devices have a beautiful and elegant design. Our products will look great in any room of your house or office.

Using the Best Equipment. We use only the best equipment in the production of our products. This ensures that you get a top-quality product that will last for years to come.

Not Easily Damaged. Our products are designed to withstand wear and tear. They are made with durable materials that are resistant to damage, so you can be sure that your devices will last a long time.

Technical Parameters:

The following table contains the specifications of different fan models:

No.	Model	Motor	Blade diameter(mm)
1	FNUK060	1	500
2	FNUK-080	2	450
3	FNUK-100	2	500
4	FNUK-120	2	500
5	FNUK-140	2	500
6	FNUK-160	2	500

Applications:

The DM-LNQ-0002 Air Cooler Condenser is available in various sizes to suit different applications and scenarios. It is a type of fin and tube condenser that is highly efficient in heat transfer. The product is corrosion-resistant, having been tested for salt spray up to 1000 hours. The tube thickness ranges from 0.3mm to 1.2mm, ensuring its durability and longevity.

This product is suitable for use as a Steam Condenser, H-Type Air Cooled Condenser, and Refrigeration Air Cooled Condenser. Its versatility makes it an ideal choice for various industries, including power generation, chemical processing, and refrigeration. The DM-LNQ-0002 Air Cooler Condenser is a new product that is in excellent condition, providing high-quality performance and reliability.
