

Versatile IQF Tunnel Freezer 1000kg/h With Direct Expansion Cooling System

Our Product Introduction

for more products please visit us on coldroomunit.com

Basic Information

- Place of Origin: China
- Brand Name: DM
- Model Number: DM-SDSD

Product Specification

- Machinery Test Report: Provided
- Capacity: 1000kg/h
- Cooling System: Direct Expansion
- Automation: Continuous Quick-freezing Work
- Temperature Range: -40 To -18
- Dimension: Customized
- Power Consumption: Customized
- Rapid Freezing: -35°C
- Name: Quick Tunnel Freezer
- Highlight: Versatile IQF Tunnel Freezer,
IQF Tunnel Freezer 1000kg/h,
IQF Blast Freezer 1000kg/h

Product Description

Direct Expansion Cooling System for Rapid Tunnel Cooler Customized Power Consumption

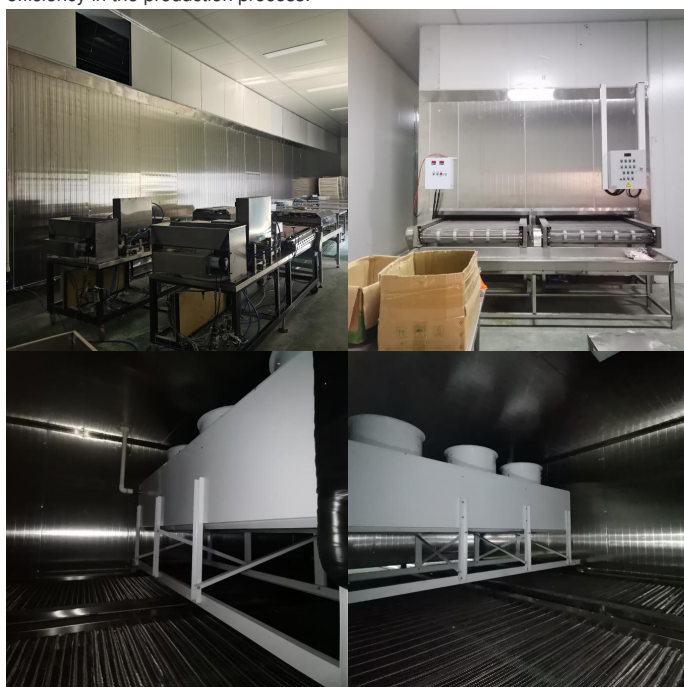

Product Description:

The quick freezing tunnel is a machine that is commonly used to transport products from the inlet to the outlet through a conveyor belt. This machine uses multiple air-cooled evaporators to supply air to the product in order to cool it quickly at room temperature within a short period of time, achieving the desired effect of quick freezing.

This machine is highly efficient and it is commonly used in industrial settings to preserve perishable products such as meat, seafood, and vegetables. These products are placed on the conveyor belt and transported through the tunnel, where they are exposed to the cold air from the evaporators.

The air-cooled evaporators in the quick freezing tunnel work by using the cold air generated by the machine to cool the product. As the product passes through the tunnel, it is exposed to the air produced by the evaporators, which rapidly cools it down to the desired temperature.

Overall, the quick freezing tunnel is an important machine for the food industry. It helps to preserve perishable products and ensure that they reach consumers in a safe and consumable state. By utilizing this machine, food producers can reduce waste and increase their efficiency in the production process.

Applications:

A tunnel freezer is a versatile refrigeration apparatus that is specifically designed for the freezing of various types of food items. It is ideally suitable for the processing of flour-based food items such as bread, cakes, and pastries, as well as fruit and vegetable processing, meat processing, aquatic food processing, and pre-fabricated food processing.

The tunnel freezer employs advanced refrigeration technology to ensure that the food items are frozen rapidly while maintaining their texture, flavor, and nutritional value. The temperature in the freezer can be regulated to suit the specific needs of different food items and the freezing process can be customized to achieve varying levels of hardness and texture.

Whether you're a food processor or a commercial kitchen owner, investing in a tunnel freezer can significantly improve the quality of your food products, reduce your operational costs, and increase your production efficiency. With a tunnel freezer, you can freeze food items in large quantities quickly and easily, ensuring that your customers always get high-quality, fresh-tasting food that they'll keep coming back for.

Tunnel Freezer for Food Processing

Belt Material

Food Grade SUS304 Stainless Steel/Modular Plastic

Condensing Type	Air cooling
Inside Temperature	40 Degree Centigrade
Cooling Method	Indirect Cooling
Condition	New
Transport Package	Wooden box
Origin	China
HS Code	8418699090

Customization:

DM brand offers customized product customization services for the DM-SDSD Quick Tunnel Freezer. Our expeditious blast freezer is made in China and has a rapid freezing capability of -35°C. The quick freezing equipment has an automation system for continuous quick-freezing work. With our express cooling system, the temperature range of the freezer is -40 to -18 , and the power consumption can be customized to fit your needs. Additionally, the dimension of the freezer can also be customized to meet your space requirements. Contact us today to learn more about our product customization services.

Support and Services:

The Quick Tunnel Freezer product technical support and services include:
 Installation and commissioning
 Maintenance and repair
 Training and education for operators and technicians
 Consultation on equipment upgrades and modifications
 24/7 remote technical support

Packing and Shipping:

Product Packaging:

The Quick Tunnel Freezer will be packaged in a sturdy cardboard box.

The box will be sealed with packing tape to ensure the product is secure during transportation.

The product will also be wrapped in bubble wrap to prevent any damage during shipping.

Shipping:

The Quick Tunnel Freezer will be shipped via a reputable courier service.

The shipping cost will be calculated based on the distance and weight of the package.

Shipping times will vary depending on the destination, but we will provide an estimated delivery date to the customer.

Customers will receive a tracking number once the product has been shipped so they can monitor the delivery status.

FAQ:

Q: What is the brand name of this freezer?

A: The brand name of this freezer is DM.

Q: What is the model number of this freezer?

A: The model number of this freezer is DM-SDSD.

Q: Where is this freezer manufactured?

A: This freezer is manufactured in China.

Q: What is the capacity of this freezer?

A: The capacity of this freezer varies depending on the model, but ranges from 500kg/hour to 2000kg/hour.

Q: How does this freezer work?

A: This freezer uses a quick tunnel freezing process to rapidly freeze food products. Food items are loaded onto a conveyor belt and passed through a series of freezing chambers where cold air is circulated around the food, quickly freezing it to a desired temperature.
