

Air Cooled / Water Cooled Cold Room Cold Storage Customized Size

Our Product Introduction

for more products please visit us on coldroomunit.com

Basic Information

- Place of Origin: CHINA
- Brand Name: DM
- Certification: CE;ISO
- Model Number: DM-LK-0009
- Minimum Order Quantity: 1
- Price: \$2000~\$100000
- Packaging Details: Wooden case
- Delivery Time: 30 Work days
- Payment Terms: T/T
- Supply Ability: 300000

Product Specification

- Name: Water Cooled Cold Room
- Condenser Type: Air Cooled/Water Cooled
- Machinery Test Report: Provided
- Size: Any Size Is Ok
- Panel Material: High Density PU Foam
- Core Components: Pressure Vessel, Motor, Bearing
- Panel: PU Panels
- Compressor: Konor / Danfoss
- Evaporator Type: Air Cooler/Plate Cooler
- Highlight: Water Cooled Cold Room Customized,
Water Cooled Cold Room Cold Storage,
Water Cooled Custom Cold Room

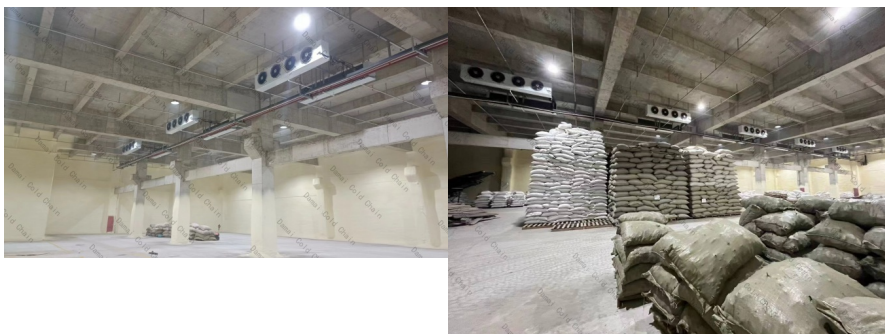

Product Description

High-Performance Freezer Cold Room for Optimal Temperature Management

Product Description:

Model NO	DM-LK-0009	Dimension(L*W*H)	Customized
Material of panels	Polyurethane cold storage board	Copper tube connector:	Fitting reducer
Voltage	380V/460V/220V	Controller:	Automatic electric controller, PLC
Refrigerant	R404a R22a R134a R507	Quality Assurance:	2.6Mpa leak-proof stress test
Door type	Swing Door/Sliding Door/Double Door/Single Door	Cold room compressor type:	Screw,Piston, Scroll etc
Use nature	Fresh Keeping Freezing	Trademark:	N/M
Density of panel	150-200kg/cm3	Certification:	ISO;CE
Core material	Rock wool Polyurethane	Temp of room:	-40°C~+20°C Customization
Fittings	All necessary fittings are included, optional

Features:

Product Name: Cold Room

The cold room is a valuable piece of equipment used for storing food items at low temperatures. It is designed to maintain optimal conditions for preserving food products, preventing spoilage and extending shelf life.

Usage: Store food

The main objective of the cold room is to store food items in a safe and hygienic manner. This is particularly important for perishable items such as meats, dairy and fresh produce. By keeping the food at the correct temperature, the cold room can help to maintain the quality and integrity of the food, ensuring that it remains fresh for longer.

Defrost Type: Electric Defrosting, Compressed Air Defrosting, Hot gas defrosting

The cold room comes equipped with three different defrost types to choose from, depending on your specific needs and preferences. These include electric defrosting, compressed air defrosting, or hot gas defrosting. Each method has its own benefits and drawbacks and can be selected based on the type of food being stored and the frequency of use.

Compressor: Danfoss/Copeland/Bitzer

The compressor is one of the most critical components of the cold room and can significantly impact its overall performance. This equipment is responsible for circulating the refrigerant fluid throughout the cooling system. The cold room comes with compressors from top brands such as Danfoss, Copeland, or Bitzer, all known for their high reliability, energy efficiency, and durability.

Condenser Type: Air Cooled/Water Cooled

The condenser is essential in releasing heat that has been absorbed from the refrigerant fluid. It comes in two variations: air-cooled or water-cooled. The air-cooled system uses fans to radiate heat, while the water-cooled system relies on a water source to cool down the condenser. The choice of the condenser type will depend on the specific environmental conditions and the cooling requirements of the cold room.

Applications:

Cold Storage Room for Food Storage

The DM-LK-0005 Cold Storage Room is ideal for businesses that require food products to be stored in low temperatures. This room has an advanced cold room air cooler system that maintains a consistent temperature, which helps to keep food fresh. The electric defrosting system makes the room easy to maintain, while the high-density PU foam panel material ensures that the room is well-insulated and energy-efficient. The temperature alarm and power failure alarm are added features that provide extra protection to your products.

Blast Cold Room for Industrial Applications

The DM-LK-0005 Cold Storage Room is also suitable for industrial applications where products need to be rapidly cooled. The room's advanced cooling system is able to bring the temperature down to the required level quickly, making it perfect for businesses that need to store sensitive materials such as chemicals, pharmaceuticals, or other industrial products.

Cold Storage Room for Agricultural Products

The DM-LK-0005 Cold Storage Room is an excellent choice for businesses that need to store agricultural products such as fruits and vegetables. Its energy-efficient design allows the room to maintain a consistent temperature, which helps to keep products fresh for longer periods. The room's Konor/Danfoss compressor ensures that the room can always maintain the required temperature, even in extreme conditions.

The Perfect Solution

No matter what your requirements are for storing food, industrial applications, or agricultural products, the DM-LK-0005 Cold Storage Room is the perfect solution for you. It is made with high-quality materials and has an advanced cooling system, temperature and power failure alarms, and is certified CE and ISO, ensuring that it meets the highest standards of quality and safety. The minimum order quantity is 1, and the price ranges from \$2000 to \$100000 depending on the size and configuration of the unit. Delivery time is 30 work days, and payment terms are T/T.

FAQ:

Q1: What is the brand name of the freezer cold room product?

A1: The brand name of the freezer cold room product is DM.

Q2: What is the model number of the freezer cold room product?

A2: The model number of the freezer cold room product is DM-0005.

Q3: What is the place of origin of the freezer cold room product?

A3: The place of origin of the freezer cold room product is China.

Q4: What certifications does the freezer cold room product have?

A4: The freezer cold room product has CE and ISO certifications.

Q5: What is the minimum order quantity for the freezer cold room product?

A5: The minimum order quantity for the freezer cold room product is 1.

Q6: What is the price range for the freezer cold room product?

A6: The price range for the freezer cold room product is between \$2000 and \$100000.

Q7: How is the freezer cold room product packaged for delivery?

A7: The freezer cold room product is packaged in wooden cases for delivery.

Q8: What is the delivery time for the freezer cold room product?

A8: The delivery time for the freezer cold room product is 30 work days.

Q9: What are the payment terms for the freezer cold room product?

A9: The payment terms for the freezer cold room product are T/T.

Q10: What is the supply ability for the freezer cold room product?

A10: The supply ability for the freezer cold room product is 300000.
