

## Continuous Quick Freezing Equipment 1000kg/h Customized Size

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: DM
- Certification: CE
- Model Number: DM-SDSD
- Minimum Order Quantity: 1
- Price: 5000
- Packaging Details: Customized according to customers
- Delivery Time: 30 work day
- Payment Terms: L/C, T/T, D/P, D/A
- Supply Ability: 1000pcs/year

#### Product Specification

- Rapid Freezing: -35°C
- Belt Speed: 0-10m/min
- Size: Customized
- Temperature Range: -40 To -18
- Function: Individual Quick Freezing
- Key Selling Points: High-accuracy
- Conveyor Speed: Customized
- Capacity: 1000kg/h
- Name: Quick Freezing Equipment
- Highlight: Continuous Quick Freezing Equipment,  
Quick Freezing Equipment 1000kg/h,  
Quick Freezing Equipment Customized\

Continuous Quick-freezing Work with Customized Conveyor Speed Quick Tunnel Freezer

Product Description:

Industrial Frozen Potato Chip Production Line

The industrial frozen potato chip production line is a fully automatic system designed to produce fresh potato chips or chips. It involves a series of processes that start from washing and peeling of the potatoes. Afterwards, tools of different shapes and sizes are used to transform the potatoes into wavy, flat, or stick shaped potato chips. Once this is done, the potato chips are bleached, dried, fried, and seasoned to make the delicious Pringle potato chips.

Quick Freezing Tunnel

The quick freezing tunnel is a crucial part of the industrial frozen potato chip production line. It is used to transport the products from the inlet to the outlet through a conveyor belt. Multiple air-cooled evaporators are used to supply air to the product and rapidly cool it down in a short period of time to achieve quick freezing. The quick freezing tunnel plays an important role in ensuring the quality and freshness of the potato chips.

Applications:

The quick freezing tunnel is designed specifically for the transportation of products. It operates by using a conveyor belt to transport items from the inlet to the outlet. Multiple air-cooled evaporators provide air to the product to rapidly cool the product at room temperature in a short amount of time. Through this process, the tunnel achieves its main objective of quick freezing.

This method is highly efficient and provides rapid results, making it ideal for processing perishable food items. Additionally, by utilizing the quick freezing tunnel, you can ensure that your products maintain their quality and nutrition, minimizing the risk of spoilage and waste.

The quick freezing tunnel is a must-have for any business dealing with perishable items. It is designed to optimize the freezing process and improve overall product quality. By using this technology, you can significantly reduce your product's time to market, thus increasing the profitability of your business.

Overall, the quick freezing tunnel is a reliable and efficient way to quickly freeze your products. Whether you are handling food, pharmaceuticals, or other perishable items, this technology is an excellent investment that will pay off in the long run.

Belt Material	Food Grade SUS304 Stainless Steel/Modular Plastic
Condensing Type	Air cooling
Inside Temperature	40 Degree Centigrade
Cooling Method	Indirect Cooling
Condition	New
Transport Package	Wooden box
Origin	China
HS Code	8418699090

## Customization:

Looking for a reliable and efficient instant tunnel chiller? Look no further than DM's DM-SDSD model from China. Our direct expansion cooling system ensures high accuracy and continuous quick-freezing work. With a temperature range of -40 to -18 , you can trust our instantaneous tunnel icebox to deliver the results you need. And with a 1-year warranty, you can have peace of mind knowing you're making a quality investment. Contact us today to learn more about our product customization services.

## Support and Services:

The Quick Tunnel Freezer is a state-of-the-art freezing system designed to freeze products quickly and efficiently. Our technical support and services include:

Installation and commissioning

Training for operators and maintenance personnel

24/7 technical support

Preventive maintenance programs

Remote monitoring and diagnostics

Spare parts and consumables

Upgrades and retrofits

Our team of experienced technicians and engineers are dedicated to providing the highest level of support to ensure the optimal performance of your Quick Tunnel Freezer.

## Packing and Shipping:

Product Packaging:

The Quick Tunnel Freezer will be packed in a sturdy cardboard box to ensure safe transportation.

All components will be securely wrapped in bubble wrap to prevent damage during shipping.

The product will come with an instruction manual and warranty information.

Shipping:

The Quick Tunnel Freezer will be shipped via a reputable courier service.

Shipping times may vary depending on the location of the customer.

Customers will receive a tracking number so they can track their order during transit.

Shipping costs will be calculated at checkout and will depend on the customer's location.

## FAQ:

**Q: What is the brand name of this freezer?**

*A: The brand name of this freezer is DM.*

**Q: What is the model number of this freezer?**

*A: The model number of this freezer is DM-SDSD.*

**Q: Where is this freezer manufactured?**

*A: This freezer is manufactured in China.*

**Q: What is the capacity of this freezer?**

*A: The capacity of this freezer varies depending on the model. Please refer to the product specifications for more information.*

**Q: What is the temperature range of this freezer?**

*A: The temperature range of this freezer is -40°C to -18°C. However, please note that this may vary slightly depending on the model.*
