

Cold Room Corrosion and rust prevention Evaporator for Customized Freezer Room

Our Product Introduction

for more products please visit us on coldroomunit.com

Basic Information

- Place of Origin: China
- Brand Name: DM
- Certification: CE ISO
- Model Number: DM-DL160
- Minimum Order Quantity: 1
- Price: 1000-100000
- Packaging Details: Customization
- Delivery Time: 20day
- Payment Terms: TT, L/C
- Supply Ability: 300000/Year

Product Specification

- Heat Transfer Efficiency: High
- Casing: Steel Plate With Plastic Spray
- Customized: Acceptable
- Feature: Not Easy To Scale
- Coil Tube: Copper
- Power Supply: 220V/380V/415V
- Defrosting: Electrical
- Gas: R404A R507
- Highlight: customized cold room evaporator,
customized freezer room evaporator,
220v cold room evaporator

Cold Room Corrosion and rust prevention Evaporator for Customized Freezer Room

Product Description:

D Series Air Cooler Introduction

The D Series Air Cooler, also called an air cooler, is a type of cooling equipment that is ideal for use in various cold storages, including both civil cold storage and combined cold storage. This air cooler has three different types, namely DL, DD, and DJ, each of which is designed to be suitable for cold storage with different storage temperatures.

One of the advantages of the D Series Air Cooler is its compact structure and lightweight design, meaning it does not take up much space within the cold storage. Additionally, it ensures uniform storage temperature throughout the storage area, providing high efficiency and quick cooling capabilities for the stored food. The D Series Air Cooler is particularly useful in helping to maintain the freshness of the stored food for longer periods of time.

DL Type ceiling air cooler technical parameters (DL160)		
NUMBER	Item	Parameter
1	Refrigerating capacity	32800W
2	Nominal area	160
3	Volume	19.6L
4	Fan Number	3
5	Fan diameter	500mm
6	Air Volume	18000m ³ /h

Features:

Product features: Characteristics:

D series air cooler is an excellent type of cooling equipment that is widely used in various warehouses and is perfect for the Freon refrigeration unit. The product is used for cooling the surroundings and ensuring the preservation of perishable items. Moreover, the temperature inside the storage unit is an essential factor, which is why the product comes in three distinct series for different warehouse temperatures.

The DL series air cooler is the perfect match for storage units around 0°C. The DL type air cooler is specially designed to ensure that the temperature of the surroundings is preserved, and the freshness of perishable items is maintained. DD series air cooler, on the other hand, is suitable for storage units with colder atmospheric temperatures of 18°C. Finally, the DJ series air cooler is perfect for storage units that require quick-freezing needs and have atmospheric temperatures below -25°C.

The D series air cooler is not only efficient but also designed to ensure that the product is durable and effective. The shell of the air cooler is made of high-quality steel plate that is corrosion-resistant and has a beautiful appearance. The coils of the air cooler are arranged in a staggered way and use mechanical expansion to ensure that the copper tube and aluminum sheet are tightly combined to improve the heat exchange effect. The product has a high-quality stainless steel electric heating tube that is evenly distributed in the coil, ensuring the defrosting effect is excellent.

Applications:

The refrigeration units which are being offered are suitable for commercial purposes. They are ideal for refrigeration, freezing and cold storage equipment in supermarkets. These refrigeration units are specifically designed to maintain cool temperatures in large spaces and can be used in conjunction with a variety of cooling systems.

They are especially ideal in commercial settings where large amounts of temperature-sensitive products need to be kept chilled for extended periods of time. These refrigeration units offer versatility and durability, adding an essential component to any business in need of reliable cooling equipment.

Overall, these refrigeration units are perfect for maintaining cool temperatures in commercial settings. They offer a great solution for

maintaining cool temperatures for an extended period of time, making them the perfect choice for supermarkets and other large-scale businesses. Their versatility and durability make them an essential component for any business seeking reliable cooling equipment.

Packing and Shipping:

Product Packaging:

The cold room evaporator will be packaged securely in a sturdy cardboard box to prevent damage during shipping.

All necessary installation components, such as mounting brackets and screws, will be included in the package.

A user manual with step-by-step instructions will be included to guide you through the installation process.

Shipping:

The cold room evaporator will be shipped via a reliable courier service to ensure timely and safe delivery.

A tracking number will be provided so you can monitor the progress of your shipment.

Shipping fees will be calculated based on the destination and weight of the package.
