

## 220V-415V Power Blasts Freezer Evaporator Enhanced Coil Tube Heat Exchanger

Our Product Introduction

for more products please visit us on [coldroomunit.com](http://coldroomunit.com)

### Basic Information

- Place of Origin: China
- Brand Name: DM
- Certification: CE ISO
- Model Number: DM-DJ40
- Minimum Order Quantity: 1
- Price: 1000-100000
- Packaging Details: Customization
- Delivery Time: 20day
- Payment Terms: TT, L/C
- Supply Ability: 300000/Year

### Product Specification

- Cold Room Type: Blast Freezer
- Coil Tube: Copper
- Tyoe: Copper Fin Type Heat Exchanger
- Application: Cold Storage/Cold Room/Freezer Room
- Fan Qty: 1pcs To 2,3,4 Pcs
- Heat Transfer Efficiency:High
- Power Supply: 220V/380V/415V
- Dimensions: Custom
- Highlight: 220v cold room evaporator,  
220v freezer room evaporator,  
415v cold room evaporator

## Industrial Custom Ceiling Type Evaporator Air Cooler With 2 Fans

### Product Description:

D Series Air Cooler

The D Series Air Cooler, also known as the air cooler, is a highly efficient cooling equipment that is suitable for different types of cold storages such as civil cold storage or combined cold storage.

The D Series Air Coolers are divided into three types: DL, DD, and D. Each type can be used for cold storages with varying temperature requirements. They have a compact structure, are lightweight, and do not occupy much space in the cold storage area.

One of the main advantages of the D Series Air Cooler is that it provides a uniformly stored temperature. As a result, the food that is stored in the cold storage is quickly cooled down, and this greatly improves the freshness of the stored food.

Over all, the D Series Air Cooler is a highly recommended option for anyone looking for an efficient and reliable cooling solution.

### Features:

Product Features:

The D series air cooler is a cooling and refrigeration device used in warehouses for Freon refrigeration units. The air cooler is divided into three series: DI, DD, and DJ, catering to warehouses with different temperatures. The DI air cooler is ideal for fresh-keeping warehouses around 0°C while DD type air coolers are suitable for cold storage at 18°C. DJ type air coolers are used in quick-freezing warehouses below -25°C.

This product series is designed to preserve, freeze, and refrigerate. The shell is made of high-quality steel plate and has a sprayed surface that is corrosion-resistant and aesthetically pleasing. The coils are arranged in a staggered manner, and the copper tube and the aluminum sheet are tightly combined using mechanical expansion. This design improves the heat exchange effect. The high-quality stainless steel electric heating tube is evenly distributed in the coil, providing excellent defrosting effects.

The cooling fan is designed with proper width, and the spacing between fan blades and aluminum fins is greater than 1/3 of the fan blade diameter, ensuring sufficient effective air volume. The air ducts can be customized according to customer requirements.

### Technical Parameters:

DJ Type ceiling air cooler technical parameters (DJ40)		
NUMBER	Item	Parameter
1	Refrigerating capacity	6800W
2	Nominal area	40
3	Volume	10.1L
4	Fan Number	2
5	Fan diameter	500mm
6	Air Volume	11000m³/h

### Applications:

The DM Cold Room Evaporator is a versatile product that can be used in different scenarios. It is perfect for use in refrigerated warehouses, food processing plants, supermarkets, and other industrial settings. The product is made in China and comes with a CE ISO certification, which is a testament to its quality and reliability.

The DM Cold Room Evaporator is available for purchase with a minimum order quantity of 1, and its price ranges from 1000 to 100000, depending on the customization options you choose. The packaging details of the product are also customizable, and the delivery time is 20 days. You can pay for your order using TT or L/C, and the supply ability of the product is 300000/Year.

The DM Cold Room Evaporator is designed to be not easy to scale, which means that it does not require frequent cleaning, making it convenient to use. The power supply of the product is 220V/380V/415V, which means that it can be used in different countries and

regions.

In conclusion, the DM Cold Room Evaporator is an efficient and reliable product that is perfect for various industrial applications. Its high heat transfer efficiency, customizable packaging, and power supply make it a versatile product that can be used in different scenarios. If you are looking for an evaporation air cooler or cool room evaporators, the DM Cold Room Evaporator is the product for you.

### FAQ:

**Q: What is the brand name of this product?**

A: The brand name of this product is DM.

**Q: What is the model number for this product?**

A: The model number for this product is also DM.

**Q: What is the place of origin for this product?**

A: This product is manufactured in China.

**Q: What certifications does this product have?**

A: This product has CE and ISO certifications.

**Zhejiang Damai Cold Chain Equipment Co., Ltd.**
