

220-240V/380-415V Freezer Room Condensing Unit With Compressor Unit Air Cooling System

Basic Information

Brand Name: DamaiCertification: CE;ISOModel Number: DM-FNH

 Minimum Order Quantity:

Price: \$200~\$100000
Packaging Details: Wooden Case
Delivery Time: 30 Work Days
Payment Terms: T/T;L/C

• Supply Ability: 1000000pcs/year

DAMAI COLD CHAIN EQUIPMEN

Product Specification

Cooling Capacity: Depends On Size And Material

Quality: OEM Quality

• Receiver Drier Included: Yes

Keyword: Blast Freezer

Bracket Included: Yes

• Highlight: 415V Freezer Room Condensing Unit,

240V Freezer Room Condensing Unit

Product Description:

The Air-Cooled Condenser is a type of cooling system facility that is often used in conjunction with equipment that requires cooling. The _Air-Cooled Condenser comes in three different types: H, V, and W. The H type of Air-Cooled Condenser is designed to facilitate side blowing. In contrast, the V and W types are designed to facilitate roof blowing.

One of the standout features of this condenser is that it has a reasonable structure and good interchangeability. This means that it can be conveniently equipped with different types of compressors, depending on the specific needs of the user.

Applications:

Refrigeration units rely heavily on the use of condensers to operate efficiently. These devices function by converting gas refrigerant into a liquid state, which allows for heat to be dissipated more easily. This change in state occurs as a result of the refrigerant passing through a series of coils where it is cooled by air or water.

Condensers play an essential role in the operation of various types of cold storage facilities, from walk-in freezers to large warehouse operations. Without condensers, such facilities would be unable to maintain the appropriate temperature for perishable items, and food spoilage and other problems would be rampant.

Parameter:

Model	Area	Row bend several	Fan					Intake	The	
			Number	Power(W	Air volume m³/h	Wind leaf diameter Ø mm	Voltage(V)	pipe Ømm	liquid pipe Ømm	Weight kg

Support and Services:

The Air Cooler Condenser product is designed to efficiently cool air in a variety of applications. Our technical support team is available to assist with any product inquiries or issues that may arise, including:

Installation guidance and support

Troubleshooting assistance

Product maintenance recommendations

Product repair services

In addition to our technical support services, we also offer a range of maintenance and repair services for the Air Cooler Condenser product. Our team of experienced technicians can provide:

Regular maintenance services to ensure optimal performance and efficiency

Repair services for any product issues or malfunctions

Replacement parts for any damaged or worn components

Our goal is to ensure that our customers receive the highest level of support and service for their Air Cooler Condenser product. Please contact us for more information on our technical support and service offerings.
