

Diameter Tube Pitch Air Cooled Condenser For Heavy Duty Cooling Systems Cold Room

Our Product Introduction

for more products please visit us on coldroomunit.com

Basic Information

- Place of Origin: China
- Brand Name: Damai
- Certification: CE
- Model Number: DM-FNH
- Minimum Order Quantity: 1
- Price: \$200~\$100000
- Packaging Details: Wooden Case
- Delivery Time: 30 Work Days
- Payment Terms: T/T
- Supply Ability: 1000000pcs/year

DAMAI COLD CHAIN EQUIPMENT

Product Specification

- Quality: OEM Quality
- Receiver Drier Included: Yes
- Keyword: Blast Freezer
- Bracket Included: Yes
- Warranty: 1 Year
- Compressor Type: Scroll
- Application: Condenser Unit
- Highlight: **Tube Pitch Air Cooled Condenser,
Cold Room Air Cooled Condenser**

Product Description

Product Description:

An Air-Cooled condenser is a type of cooling facility that is commonly used in conjunction with other cooling equipment. The condenser comes in three different types, named H, V, and W. Among these, H type is designed for side blowing while V and W types are specially made for roof blowing.

The Air-Cooled condenser boasts of a well-designed and reasonably structured construction that provides excellent interchangeability capabilities. It can be fitted with different types of compressors to suit the varying needs of different customers.

There are two different types of condenser fins, which are window fin and honeycomb fin. These types have been designed to meet the various requirements of customers and allow them to choose the one that best suits their needs.

Applications:

Condensers play a crucial role in refrigeration units, as they are primarily responsible for releasing heat from the refrigerant. These devices are widely utilized in various types of cold storage facilities, including warehouses, supermarkets, and food processing plants. Without condensers, the refrigerant in the system would not be able to turn from a gas to a liquid state, which is essential for cooling. By removing heat from the refrigerant, condensers help maintain the desired temperature inside the refrigeration unit.

In addition to their use in cooling and refrigeration applications, condensers can also be found in other industries such as chemical processing and power generation. They come in different shapes and sizes, and can be air-cooled or water-cooled depending on the specific application.

Customization:

Product Customization Services for Air Cooler Condenser:

Brand Name: Damai

Model Number: DM-FNH

Place Of Origin: Zhejiang China

Minimum Order Quantity: 1

Packaging Details: Wooden Case

Delivery Time: 15 Work Days
Bracket Included: Yes
Application: Condenser Unit
Keyword: Blast Freezer
Voltage: 220-240V/380-415V
Product Attributes:
H-Type Air Cooled Condenser
Refrigeration Air Cooled Condenser

Support and Services:

In addition, we provide training sessions to help your staff understand the product's features and operation, allowing them to troubleshoot minor issues on their own. Our customer service team is always available to answer any questions you may have about the product or our services.
