

High Temperature Cold Room Evaporator With 4 Pcs Fan Qty / Electric Defrosting

Our Product Introduction

for more products please visit us on coldroomunit.com

Basic Information

- Place of Origin: China
- Brand Name: DM
- Certification: CE ISO
- Model Number: DM-DL
- Minimum Order Quantity: 1
- Price: 1000-100000
- Packaging Details: Customization
- Delivery Time: 20day
- Payment Terms: TT, L/C
- Supply Ability: 300000/Year

Product Specification

- Coil Tube: Copper
- Temperature: High, Medium, Low Temperature
- Fan Qty: 1pcs To 2,3,4 Pcs
- Condition: New
- Customized: Acceptable
- Heat Transfer Efficiency: High
- Casing: Steel Plate With Plastic Spray
- Material Of Fin: Material Of Fin
- Highlight: **High Temperature Cold Room Evaporator ,
High Temp Cold Room Evaporator**

High Temperature Cold Room Evaporator with 4 Pcs Fan Qty and Electric Defrosting

Product Description:

The D-series air cooler, which is also referred to as a chiller, is an appropriate cooling and refrigeration equipment that can be used in various types of cold storages such as the civil cold storage or the combined cold storage. The D-series air cooler comes in three different types, which are the DL, DD, and DJ; each of these types is suitable for different storage temperature cold storages.

The D-series air cooler boasts of various advantages that include its lightweight and compact structure, which do not occupy the area of the cold storage. It guarantees a uniform temperature of the storage and high efficiency in cooling down the food stored in the cold storage. This feature allows the stored food to cool down quickly, therefore greatly enhancing the freshness of the stored food.

Features:

Product Features:

The D Series Chiller is a type of refrigeration equipment used in freon refrigeration units. This chiller is designed for preservation, freezing, and refrigeration. Depending on the use of temperature, the D Series chiller is divided into DL, DD, and DJ three series which can be applied to different storage temperatures. DL type chiller is mainly suitable for 0 or so fresh storage, DD type chiller is mainly suitable for 18 cold storage. D type chiller is mainly suitable for quick-freezing storage below -25 .

This series of products has the following characteristics:

High-quality steel plate shell with a plastic sprayed surface that is corrosion-resistant and has a beautiful appearance

Coil has a staggered arrangement and mechanical expansion of the tube, ensuring the copper tube and aluminum sheet are closely combined and the heat transfer effect is good

High-quality stainless steel electric heating tube is evenly distributed in the coil, providing good defrosting effect

Defrosting is done through a stainless steel electric heating tube which has good heat dissipation and long life

The design width of the chiller is reasonable with a spacing between the blades and the aluminum fins greater than 1/3 of the diameter of the blades, ensuring sufficient effective air volume

DL Type Ceiling air cooler technical parameters (DL20)

NUMBER	Item	Parameter
1	Refrigerating capacity	4260W
2	Nominal area	20
3	Volume	2.7L
4	Fan Number	2
5	Fan diameter	300mm
6	Air Volume	3126m³/h

Applications:

The Type D series of air coolers can be used in conjunction with compressor units of varying cooling capacity to achieve the desired storage temperature in different cold storage environments.

When the desired storage temperature is approximately 0°C, the DL type air cooler can be used for cold storage of fresh eggs or

vegetables. On the other hand, the DD type air cooler is ideal for cold storage of meat, fish, and other frozen foods, where the storage temperature can reach as low as -18°C. For cold storage that requires a temperature of -25°C, Type D air cooler is recommended for quickly freezing meat or fresh fish products, as well as prepared foods.

Support and Services:

Our Cold Room Evaporator product comes with comprehensive technical support and services to ensure optimal performance and longevity. Our team of experts is available to assist with installation, maintenance, and troubleshooting. We also offer regular maintenance and cleaning services to keep your evaporator running smoothly. Additionally, we provide training and educational resources to help you and your staff understand how to properly operate and maintain the equipment. Contact us for more information on our technical support and services.

Packing and Shipping:

Product Packaging: -----
The cold room evaporator will be securely packed in a sturdy cardboard box.
The product will be wrapped in bubble wrap to prevent any damage during shipping.
All necessary accessories and installation instructions will be included in the package.
Shipping:
The product will be shipped via a reliable courier service.
Shipping charges will be calculated based on the delivery address and will be added to the total cost of the product.
The estimated delivery time will be provided to the customer at the time of purchase.
The customer will receive a tracking number to track the status of their shipment.
