

Advanced Technology Air Cooled Condensing Units With Highly Compressor And Microprocessor Controller Type

Our Product Introduction

for more products please visit us on coldroomunit.com

Basic Information

- Place of Origin: CHINA
- Brand Name: DM
- Certification: CE;ISO
- Model Number: DM-UNIT-L
- Minimum Order Quantity: 1
- Price: \$2000~\$100000
- Packaging Details: Wooden case
- Delivery Time: 30 Work days
- Payment Terms: T/T
- Supply Ability: 1000000pcs/year

Product Specification

- Condenser: Air-cooled Condenser
- Trademark: DM
- Condensing Temperature: 0~10c And -15~-25c
- Controller Type: Microprocessor
- Voltage: 380V/ 3p/ 50Hz, 220V/ 3p/ 60Hz, 380V/ 3p/ 60Hz
- Cooling Capacity: 5kw-1000kw
- Suitable For: Supermarket, Food Storage,Cold Room
- Frequency: 60Hz
- Highlight: 5kw condensing unit air cooled,
220v condensing unit air cooled,
5kw air cooled condensing units

Product Description

Product Description:

One of the standout features of this unit is its quiet operation. Unlike many other condensing units on the market, this unit is specifically designed to operate with minimal noise. This makes it an excellent choice for use in environments where noise levels need to be kept to a minimum.

The DM Cold Room Condensing Unit is also equipped with a semi-hermetic piston compressor, which provides reliable and efficient performance. This type of compressor is known for its durability and long lifespan, making it an excellent choice for anyone who wants a condensing unit that will last for years to come.

When it comes to voltage, the DM Cold Room Condensing Unit is available in a variety of options to suit different needs. Whether you need a 380V/ 3p/ 50Hz, 220V/ 3p/ 60Hz, or 380V/ 3p/ 60Hz unit, you can find the perfect match for your application.

The DM Cold Room Condensing Unit is also equipped with a microprocessor controller, which allows for precise control over the unit's operation. This controller is easy to use and provides accurate readings for temperature, pressure, and other important parameters.

If you need condensing unit parts, the DM Cold Room Condensing Unit can also be easily serviced and maintained. This unit is designed with accessibility in mind, making it easy to replace parts and perform routine maintenance tasks.

Overall, the DM Cold Room Condensing Unit is an excellent choice for anyone in need of an air-cooled condensing unit that provides reliable performance, quiet operation, and precise control. With its advanced features and high-quality construction, this unit is sure to meet your needs and exceed your expectations.

item	value
Condition	New
Applicable Industries	Building Material Shops, Manufacturing Plant, Food & Beverage Factory, Food Shop, Construction works, Energy & Mining, Food & Beverage Shops, Other
Weight (KG)	65
Showroom Location	Viet Nam
Video outgoing-inspection	Provided
Machinery Test Report	Provided
Marketing Type	New Product 2025
Place of Origin	China
Type	Refrigeration Compressor
Application	Refrigeration Parts
Warranty	1 Year

Product name	Condensing Unit
Refrigerant	R404A.R134a.R507
Description	Cold Storage Refrigeration System
MOQ	1 Set
Keywords	Customized and Low Noise With Cheaper Price

Features:

Advantages of Semi-hermetic Compressor Condensing Unit for Cold Room.

The semi-hermetic compressor condensing unit has many advantages that make it an excellent choice for cold room applications. One of the key advantages is its compact structure. This allows it to fit into smaller spaces and makes it easier to install. Additionally, the unit comes with complete protective devices which help ensure that it operates as intended.

An increased condenser is another feature of the semi-hermetic compressor condensing unit. This results in better heat dissipation which is crucial for maintaining a stable temperature within the cold room. Thanks to this feature, the unit can keep a good cooling effect for a long time, making it a reliable choice for businesses and other users.

Another noteworthy benefit of using a semi-hermetic compressor condensing unit is its energy efficiency. By using this type of condensing unit, users can save up to 30% on their electricity bill. This is a significant cost-saving solution that makes it particularly attractive to business owners who are looking to reduce their expenses.

Furthermore, the unit is designed to operate at a low noise level. This is important because it ensures that the cold room remains a quiet place to work or store goods. Finally, the unit is equipped with brand accessories and parts. This adds to its reliability and ensures that it will perform well for an extended period of time.

Applications:

The DM-UNIT-L Commercial Refrigeration Condensing Unit is a high-quality product that is manufactured in China. It is a highly efficient and reliable condensing unit that is designed to provide the best performance in various industrial and commercial applications.

The DM-UNIT-L Air Cooled Condensing Units are ideal for use in refrigeration and air conditioning systems. They are designed to provide maximum cooling efficiency, reliability, and durability in various applications. The product is certified with CE and ISO, ensuring its quality and reliability.

The DM-UNIT-L Freezer Room Condensing Unit is a powerful and efficient system that is designed to provide reliable and high-quality performance in freezer rooms. The unit has a low evaporating temperature range of -35~-23celsius Degree, which makes it perfect for use in cold rooms, freezers, and other low-temperature applications.

The DM-UNIT-L is designed to operate silently, making it perfect for use in quiet environments such as hospitals, libraries, and offices. It is powered by DC, making it energy efficient and cost-effective. The controller type is microprocessor, which ensures accurate temperature control and easy operation. The fans species are frequency fan, which provides efficient cooling with less noise.

The DM-UNIT-L is packed in a wooden case that ensures safe and easy transportation. The minimum order quantity is one, and the price ranges between \$2000~\$100000, making it affordable for various applications. The delivery time is 30 work days, and the payment terms are T/T. The product has a supply ability of 1000000pcs/year, ensuring that there is always a stock available.

Support and Services:

Our Condensing Units are designed to provide reliable and efficient cooling solutions for a wide range of applications. Our technical support team is available to assist with any questions or issues you may encounter with your unit.

We offer a variety of services to ensure that your Condensing Unit operates at peak performance, including:

Installation assistance

Regular maintenance programs

Repair services

Parts replacement

Technical training and support

Our goal is to provide exceptional customer service and support to ensure that your Condensing Unit meets your cooling needs for years to come.

FAQ:

Q1. What is the brand name of the condensing unit?

A1. The brand name of the condensing unit is DM.

Q2. What is the model number of the condensing unit?

A2. The model number of the condensing unit is DM-UNIT-L.

Q3. What is the place of origin of the condensing unit?

A3. The place of origin of the condensing unit is China.

Q5. What is the minimum order quantity of the condensing unit and how is it packaged?

A5. The minimum order quantity for the condensing unit is 1 and it is packaged in a wooden case.

Q7. How long does it take to deliver the condensing unit?

A7. The delivery time for the condensing unit is 30 work days.

Q8. What are the payment terms for the condensing unit?

A8. The payment terms for the condensing unit are T/T.

Q9. What is the supply ability of the condensing unit?

A9. The supply ability of the condensing unit is 1000000pcs/year.
