

Blast Freezer Air Cooler Condenser With Air Cooled Cooling Method Refrigeration

Our Product Introduction

for more products please visit us on coldroomunit.com

Basic Information

- Place of Origin: China
- Brand Name: Damai
- Certification: CE;ISO
- Model Number: DM-FNV
- Minimum Order Quantity: 1
- Price: \$200~\$100000
- Packaging Details: Wooden Case
- Delivery Time: 15 Work Days
- Payment Terms: T/T
- Supply Ability: 1000000pcs/year

DAMAI COLD CHAIN EQUIPMENT

Product Specification

- Number Of Fans: 2-6
- Motor Type: Direct Drive
- Origin: China
- Cooling Method: Air Cooling
- Type: Air-Cooled
- Application: Commercial/Industrial
- Voltage: 380V/220V
- Keyword: Blast Freezer Condenser
- Highlight: **Blast Freezer Air Cooler Condenser,
Air Cooled Air Cooler Condenser,
Refrigeration Air Cooler Condenser**

Product Description

Product Description:

With a number of fans ranging from 2 to 6, this air-cooled condenser boasts of a powerful cooling method that is second to none. This feature ensures that your refrigeration system is always in top condition, providing the required cooling to keep your products fresh and safe.

The V-Type Air Cooled Condenser is designed to use air as the cooling medium, making it easy to install and maintain. This feature also ensures that the condenser is environmentally friendly, as it does not require water for cooling.

When it comes to voltage, this air-cooled condenser is designed to operate on both 380V and 220V, making it a versatile option for different industrial and commercial applications.

Investing in the V-Type Air Cooled Condenser guarantees value for your money, as it is designed to provide reliable and efficient cooling for a long time. With its sturdy construction and high-quality materials, you can be sure that this air-cooled condenser will withstand the test of time and provide the necessary cooling for your refrigeration system.

In conclusion, the V-Type Air Cooled Condenser is a top-of-the-line refrigeration air cooled condenser that is designed to provide efficient and reliable cooling for your commercial or industrial refrigeration needs. With its powerful cooling method, direct drive motor type, and versatile voltage options, you can be sure that this air-cooled condenser will provide the required cooling for your refrigeration system, keeping your products fresh and safe.

Features:

Product Name: Air Cooler Condenser

Cooling Method: Air Cooling

Motor Type: Direct Drive

Origin: China

Number Of Fans: 2-6

Type: Air-Cooled

Keywords: Freezer Room Condensing Unit, Steam Condenser, Refrigeration Air Cooled Condenser

Model	Heat Exchange Capacity	Heat Interchanging Area	Length	Width	Height	External Rotor Motor				Pipe size

Technical Parameters:

Number Of Fans	2-6
Voltage	380V/220V
Motor Type	Direct Drive
Keyword	Blast Freezer Condenser
Origin	China
Application	Commercial/Industrial
Type	Air-Cooled
Cooling Method	Air Cooling

Air Cooled Fnh Refrigeration Condenser for Cold Storage, Air Conditioner Condenser Evaporator, Freezer Room Condensing Unit

Applications:

The Damai DM-FNV Air Cooler Condenser is an ideal product for various scenarios and occasions. It is perfect for blast freezer condenser, steam condenser, air conditioner condenser, and evaporator. The cooling method of this product is air cooling, making it more environmentally friendly than traditional water-cooled systems. It is a type of air-cooled condenser that has 2-6 fans, depending on the unit's size. This makes it a powerful and efficient cooling system for industrial and commercial applications.

The Damai DM-FNV Air Cooler Condenser is suitable for use in a variety of commercial and industrial settings. In commercial settings, it can be used in restaurants, supermarkets, and food processing plants. It can also be used in refrigerated trucks and containers for transporting goods. In industrial settings, it can be used in factories, chemical plants, and pharmaceutical plants.

The H-Type Air Cooled Condenser is perfect for scenarios where water is scarce or expensive. The air-cooled system is more energy-efficient and cost-effective than traditional water-cooled systems. It also requires less maintenance and has a longer lifespan.
