

# Blast Freezer Air Cooler Condenser with 2-6 Fans Voltage 380V/220V cold storage room

# **Basic Information**

- Place of Origin:
- Brand Name:
- Certification: CE
- Model Number: DM-FNU
  Minimum Order 1
- Minimum Order Quantity:
- Price: \$200~\$100000

China

Damai

- Packaging Details: Wooden Case
- Delivery Time: 15 Work Days
- Payment Terms: T/T
- Supply Ability: 100000pcs/year

# **Product Specification**

Cooling Method:	Air Cooling
Keyword:	Blast Freezer Condenser
• Type:	Air-Cooled
Application:	Commercial/Industrial
Motor Type:	Direct Drive
Voltage:	380V/220V
• Origin:	China
Number Of Fans:	2-6
• Highlight:	industrial air cooler condenser, industrial air cooling condenser

### **Product Description:**

The Air Cooler Condenser is equipped with a direct drive motor type that is known for its reliability and efficiency. This motor type ensures that the Air Cooler Condenser operates smoothly and efficiently. It is also equipped with a 380V/220V voltage that allows it to work with most electrical systems. This voltage is ideal for commercial and industrial applications because it can handle high electrical loads and is safe to use.

The Air Cooler Condenser is a perfect fit for commercial and industrial applications. Its design and construction make it highly effective in cooling refrigerants. It is also ideal for use in cold storage facilities, where it can maintain the required temperatures for food and other perishable items.

The Air Cooler Condenser is a reliable and durable product that can withstand harsh environmental conditions. It is designed to operate efficiently and effectively even in extreme temperatures. This makes it an ideal solution for industrial and commercial applications where the condenser is subjected to high temperatures and heavy usage.

With the Air Cooler Condenser, you get a high-quality product that is designed to meet your specific needs. Whether you need a steam condenser, air-cooled Fnh refrigeration condenser for cold storage or an air condenser cooler, the Air Cooler Condenser is the perfect choice. Its excellent performance, reliability, and durability make it a top-performing product that delivers excellent results every time.

# **Features:**

Product Name: Air Cooler Condenser Number Of Fans: 2-6 Cooling Method: Air Cooling Voltage: 380V/220V Type: Air-Cooled Application: Commercial/Industrial

### **Technical Parameters:**

## **Applications:**

The Damai DM-FNU Air-Cooled Condenser is a perfect fit for commercial and industrial applications. It is commonly used in blast freezers, freezer rooms and steam condensers. Thanks to its Direct Drive motor type, this air cooler condenser is efficient and reliable, providing optimal cooling performance while using minimal energy. The voltage options of 380V/220V make it adaptable to different electrical systems.

In summary, the Damai DM-FNU Refrigeration Air Cooled Condenser is a reliable and efficient product that is perfect for commercial and industrial use. Its adaptability to different electrical systems, low energy consumption, and availability in large quantities make it an excellent investment. Whether you need a freezer room condensing unit, blast freezer condenser or steam condenser, this product has got you covered.

## Support and Services:

The Air Cooler Condenser product comes with a range of technical support and services:

Installation assistance and guidance

Product troubleshooting and diagnostics Repair and maintenance services

Technical training and education

Replacement parts and accessories

Warranty support and processing

Our team of experienced technicians and support staff are dedicated to ensuring the performance and longevity of your Air Cooler Condenser product. Contact us for any technical assistance you may require.
