

## Portable or Permanent Installation Workshop Refrigeration Solutions in Various Sizes

Our Product Introduction

for more products please visit us on [coldroomunit.com](http://coldroomunit.com)

### Basic Information

- Place of Origin: China
- Brand Name: DM
- Model Number: DM-JZ-LGJ

### Product Specification

- Certifications: CE/ETL
- Warranty: 1 Year
- Airflow: Horizontal/Vertical
- Refrigerant: R410A
- Compressor Type: Scroll/Rotary
- Power Supply: 110V/220V
- Cooling Method: Air-cooled
- Application: Workshop Cooling
- Highlight: **Various Sizes Workshop Refrigeration Solutions**  
**, Portable Workshop Refrigeration Solutions,**  
**Permanent Installation Workshop Refrigeration Solutions**

## Product Description

### Product Description:

Our company offers a wide range of cold storage options including freezer rooms, blast freezers, meat and seafood cold storage, fruit and vegetable storage, display cold rooms, chiller rooms, and logistics cold storage facilities.

Our customer's needs are our top priority and we offer customizable cold storage options to meet their specific requirements.

### Features:

Product Name: Workshop Cooling Solutions

Dimensions: Various Sizes Available

Cooling Capacity: Up To 50,000 BTU/hr

Noise Level: Less Than 70 DB

Control System: Digital/Analog

Airflow: Horizontal/Vertical

Application: Production Facility Air Cooling, Warehouse Cooling Solutions, Assembly Line Cooling Equipment

### Technical Parameters:

Temperature Ranges for Different Purposes

If you want to ripen fruits, the temperature should be maintained above 25C.

For processing rooms, the temperature should be between 12-19C.

Fruits, vegetables and dry foods should be stored in a temperature range of -5 to +10C.

For the storage of medicines, cakes, pastries and chemical materials, the temperature range should be 0C to -5C.

An ice storage room should maintain a temperature range of -5 to -10C.

For storing fish and meat, the temperature should be -18 to -25C.

Deep freezers, low temperature storage, quick-freezers and blast freezers require a temperature range of -25C to -40C.

## Applications:

Freezer rooms are equipped with temperature control systems that artificially generate specific temperatures, usually designed to store products in environments with temperatures below the outside temperature. These rooms are essential in the preservation and storage of various products, ranging from food items to medical supplies that require specific atmospheric conditions to remain fresh or functional. The combination cold room is a unique type of freezer room that is assembled using Polyurethane (PU) panels. These panels give the cold room good air tightness and heat insulation effects, which help maintain optimal temperatures by preventing heat exchange between the inside and outside environment.

## Customization:

Customize your Industrial Workshop Chillers with DM's Workshop Cooling Solutions. Our Model Number DM-JZ-LGJ is made in China and has a Cooling Capacity of up to 50,000 BTU/hr using the Air-cooled Cooling Method. We offer various sizes to fit your Production Facility Air Cooling needs. Our Workshop Cooling Solutions come with a 1 Year Warranty and are available in both 110V and 220V Power Supply options.

## FAQ:

### FAQs for DM Workshop Cooling Solutions:

**Q: What is the model number of the workshop cooling solution?**

A: The model number of the workshop cooling solution is DM-JZ-LGJ.

**Q: Where is the workshop cooling solution manufactured?**

A: The workshop cooling solution is manufactured in China, which is also the place of origin.

**Q: What is the cooling capacity of the DM-JZ-LGJ model?**

A: The cooling capacity of DM-JZ-LGJ model is 18000 BTU/hour.

**Q: Can the workshop cooling solution be used for residential purposes?**

A: The workshop cooling solution is designed for commercial and industrial purposes and may not be suitable for residential use.
