

R404a/R134a Refrigerant Fruit Cold Storage Room with Temperature Range walk in cooler

Our Product Introduction

for more products please visit us on coldroomunit.com

Basic Information

- Place of Origin: China
- Brand Name: DM
- Model Number: DM-JZ-LGJ
- Minimum Order Quantity: 1
- Packaging Details: Customized according to customers
- Delivery Time: 30 work day
- Payment Terms: T/T, L/C, D/A

Product Specification

- Controller: Microcomputer/PLC
- Condenser Type: Air Cooled/Water Cooled
- Evaporator Type: Air Cooler/Evaporative Condenser
- Power Supply: 220V/380V/440V
- Cooling System: Direct Expansion/Indirect Cooling
- Warranty: 1 Year/2 Years/3 Years
- Compressor Brand: Bitzer/ Copeland
- Insulation Material: Polyurethane Foam
- Highlight: **R134a Fruit Cold Storage Room, cold storage room for fruits and vegetables, R404a Fruit Cold Storage Room**

Product Description

Product Description:

The freezer room is a type of warehouse that is designed to generate and maintain a specific temperature artificially. It is typically created to store various products in an environment that is cooler than the outside temperature, preserving them for longer periods of time.

The combination cold room is a specific type of freezer room that is constructed using PU panels. These panels not only provide excellent insulation for the cold room but also contribute to its airtight nature. As a result, the cold room maintains the desired temperature at all times while also keeping the products inside safe from any external factors that could affect their quality.

The combination cold room and other types of freezer rooms are widely used in various industries such as food storage, pharmaceuticals, and research facilities. They offer a reliable method of ensuring the safety and longevity of products and other goods that require specific temperature conditions.

Technical Parameters:

Nature Usage and Temperature Range for Different Items

If you want to ripe fruits, you should keep them in an environment that has a temperature range of above 25°C.

For processing rooms, a temperature range of 12~19°C will be suitable. This will help to maintain the quality of the processed items.

Fruits, vegetables, and dry foods should be stored in an environment that has a temperature range of -5~+10°C. This will help to preserve their freshness and prevent spoilage.

Medicine, cakes, pastries, and chemical materials require a temperature range of 0°C~-5°C for preservation. This will ensure their potency and quality are not affected.

The ice storage room should have a temperature range between -5°C and -10°C. This will help to preserve the quality of the ice and make it readily available for use.

For fish and meat storage, a temperature range between -18°C and -25°C is ideal. This will ensure that the meat and fish remain safe for consumption and do not spoil.

The deep freezer, low temperature storage, quick-freeze, and blast freezer are best kept in a temperature range of -25°C~-40°C. This will preserve the quality and freshness of the frozen items.

Applications:

Are you looking for a place to store your goods at low temperatures? Look no further than our selection of specialized cold storage options! From freezer rooms to blast freezers, we have everything you need to keep your products at optimal temperatures.

Our meat cold storage ensures that your meat remains fresh for an extended period, while our fruit and vegetable storage rooms keep the produce crisp and nutritious. If seafood is your specialty, our seafood storage facilities are the perfect choice for you.

In addition to our specialized storage options, we also offer display cold rooms for showcasing your products to customers. Our chiller room is perfect for storing beverages at the ideal temperature, and our logistics cold storage ensures that your goods are delivered to their destination in the same condition as when they left your hands.

Choose our cold storage solutions for reliable, professional service and peace of mind knowing that your products are in good hands.

Packing and Shipping:

Product Packaging:

The Fruit Cold Storage Room will be packaged in a sturdy cardboard box to ensure safe delivery. The contents will be securely packed with bubble wrap and other protective materials to prevent any damage during transit.

Shipping:

The Fruit Cold Storage Room will be shipped via standard ground shipping. Customers can expect their order to arrive within 5-7 business days from the date of purchase. Expedited shipping options are also available for an additional cost.

FAQ:

Q: What is the brand name of this fruit cold storage room?

A: The brand name of this product is DM.

Q: What is the model number of this fruit cold storage room?

A: The model number of this product is DM-JZ-LGJ.

Q: Where is this fruit cold storage room made?

A: This product is made in China.

Q: What is the capacity of this fruit cold storage room?

A: The capacity of this product varies depending on the size you choose. Please refer to the product specifications for more information.

Q: What temperature range can this fruit cold storage room maintain?

A: This product is designed to maintain temperatures between 0°C and 10°C, which is ideal for storing fruits and vegetables.
