

Direct Drive Motor Type Air Cooler Condenser for Cooling in Commercial/Industrial Environments

Basic Information

Place of Origin: China
Brand Name: Damai
Certification: CE;ISO
Model Number: DM-DV

 Minimum Order Quantity:

Price: \$200~\$100000
 Packaging Details: Wooden Case
 Delivery Time: 15 Work Days

• Payment Terms: T/T

• Supply Ability: 1000000pcs/year

Product Specification

Motor Type: Direct DriveCooling Method: Air Cooling

Application: Commercial/Industrial
 Keyword: Blast Freezer Condenser

• Number Of Fans: 2-6

Voltage: 380V/220VOrigin: ChinaType: Air-Cooled

• Highlight: Direct Drive Air Cooler Condenser,

Commercial Air Cooler Condenser, Industrial Air Cooler Condenser

Product Description:

The V-Type Air Cooled Condenser is a highly efficient heat rejection unit designed for a variety of industrial and commercial applications... Engineered to provide optimal performance, this condenser utilizes a space-saving V-shaped configuration that maximizes airflow and heat transfer efficiency. It is ideal for use in HVAC systems, refrigeration, and cooling processes where air is the primary cooling medium. The unique V-shaped design of this condenser allows for improved airflow compared to traditional models, resulting in enhanced cooling performance and energy efficiency. It is well-suited for installations where space is limited, as the compact layout enables easy integration into existing systems.

With its durable construction and high-quality materials, the V-Type Air Cooled Condenser offers reliable and long-lasting operation. It is a versatile solution for various cooling applications, providing consistent performance and efficiency for demanding industrial and commercial environments.

Applications:

Air conditioning systems are units used to control and maintain a comfortable environment by regulating the air temperature and humidity. These systems are commonly found in homes, offices, and vehicles.

Refrigeration units are devices designed to cool and store perishable items such as food and medicine. They work by removing heat from the enclosed space and transferring it to the external environment, thereby preserving the contents.

Industrial cooling systems are large-scale setups used in manufacturing plants, data centers, and other industrial facilities to remove excess heat generated by machinery and equipment. These systems play a crucial role in maintaining optimal working conditions and preventing equipment overheating.

Process cooling refers to the cooling of specific industrial processes to ensure efficient operation and product quality. This may involve the use of specialized cooling equipment tailored to the needs of the particular production process.

Support and Services:

The Product Technical Support and Services for the Air Cooler Condenser product include:

- Installation guidance and support
- Troubleshooting assistance for any operational issues
- Regular maintenance recommendations
- Warranty coverage details
- Product training and user manuals

FAQ:

- Q: What is the brand of the Air Cooler Condenser?
- A: The brand of the Air Cooler Condenser is Damai.
- Q: What is the model number of the Air Cooler Condenser?
- A: The model number of the Air Cooler Condenser is DM-DV.
- Q: Where is the Air Cooler Condenser manufactured?
- A: The Air Cooler Condenser is manufactured in China.
- Q: What certifications does the Air Cooler Condenser have?
- A: The Air Cooler Condenser is certified with CE and ISO.
- Q: What is the minimum order quantity for the Air Cooler Condenser?
- A: The minimum order quantity for the Air Cooler Condenser is 1.
