

Direct Drive Motor and Air Cooled Condenser The Ultimate Cooling Solution for Blast Freezers

Our Product Introduction

for more products please visit us on coldroomunit.com

Basic Information

- Place of Origin: China
- Brand Name: Damai
- Certification: CE;ISO
- Model Number: DM-DV
- Minimum Order Quantity: 1
- Price: \$200~\$100000
- Packaging Details: Wooden Case
- Delivery Time: 15 Work Days
- Payment Terms: T/T
- Supply Ability: 1000000pcs/year

Product Specification

- Cooling Method: Air Cooling
- Keyword: Blast Freezer Condenser
- Number Of Fans: 2-6
- Application: Commercial/Industrial
- Motor Type: Direct Drive
- Origin: China
- Voltage: 380V/220V
- Type: Air-Cooled
- Highlight: **Blast Freezers Air Cooled Condenser,
Direct Drive Air Cooled Condenser,
Blast Freezers Condenser**

Product Description

Product Description:

The V-Type Air Cooled Condenser is a high-efficiency heat rejection unit specifically created for a range of industrial and commercial uses. It is engineered to deliver top-notch performance by employing a compact V-shaped design that enhances airflow and heat transfer efficiency. This type of condenser is most suitable for applications in HVAC systems, refrigeration, and cooling processes that rely on air as the main cooling medium.

Designed for versatility and effectiveness, the V-Type Air Cooled Condenser is a valuable component in various settings where efficient heat rejection is crucial. Its space-saving configuration and innovative design ensure maximum performance and reliability in industrial and commercial environments. Whether used in HVAC systems, refrigeration units, or other cooling applications, this condenser excels at optimizing heat transfer efficiency for superior performance.

Applications:

Air conditioning systems are devices that control indoor temperature, humidity, and air quality to create a comfortable environment for occupants. They work by removing heat from the air inside a building and transferring it outside.

Refrigeration units are appliances used to cool and store food, beverages, and other perishable items at low temperatures. They rely on the process of vapor compression or absorption to remove heat from the interior space.

Industrial cooling systems are large-scale setups designed to cool manufacturing equipment, machinery, or industrial processes. They help maintain optimal operating temperatures to ensure efficiency and productivity.

Process cooling refers to the specific cooling requirements for various industrial processes, such as temperature control for chemical reactions, material processing, or equipment cooling. It plays a crucial role in ensuring the quality and safety of production processes.

Support and Services:

Our Product Technical Support and Services for the Air Cooler Condenser include:

- Troubleshooting assistance for any operational issues.
- Guidance on maintenance and cleaning procedures to ensure optimal performance.
- Warranty support and information on available service plans.
- Technical documentation and manuals for reference.
- Access to our team of experts for product-related inquiries.

FAQ:

Q: What is the brand name of the Air Cooler Condenser?

A: The brand name of the Air Cooler Condenser is Damai.

Q: What is the model number of the Air Cooler Condenser?

A: The model number of the Air Cooler Condenser is DM-DV.

Q: Where is the Air Cooler Condenser manufactured?

A: The Air Cooler Condenser is manufactured in China.

Q: What certifications does the Air Cooler Condenser have?

A: The Air Cooler Condenser is certified with CE and ISO.

Q: What is the minimum order quantity for the Air Cooler Condenser?

A: The minimum order quantity for the Air Cooler Condenser is 1.
