Product Description

Product Description:

Air-Cooled Condenser is a type of heat transfer device that is paired with cooling equipment. There are three available types: **H**, **V**, and **U**. The **H** type is characterized by side blowing, while the **V** and **W** types feature roof blowing. It possesses a well-thought-out structure and excellent interchangeability, making it adaptable for use with various compressor models. The condenser is designed with window fins and honeycomb fins, catering to the diverse requirements of different customers.

Applications:

Applications of Air-Cooled Condenser:
