Product Description

Product Description:

Air-Cooled Condenser is a type of heat-exchange device used in conjunction with cooling systems. It comes in three varieties: H, V, and W. The H type is designed for side blowing, while the V and W types are configured for roof blowing.

This condenser boasts a well-thought-out structure and excellent versatility, allowing it to be paired with various types of compressors.

The Air-Cooled Condenser is equipped with two types of fin designs: window fin and honeycomb fin, catering to the diverse requirements of different customers.

Applications:

Applications of Air-Cooled Condenser:

1. Cold Storage Facilities - Food, pharmaceuticals, or chemical preservation.
2. Industrial Workshops - Cooling machinery or process areas (e.g., plastics, metalworking).
