Product Description

Product Description:

Air-Cooled condenser is a type of cooling system designed to work in conjunction with specific cooling equipment. This facility comes in three different types: H, V, and W. The H type is characterized by side blowing, while the V and W types feature roof blowing. Known for its efficient structure and high interchangeability, the Air-Cooled condenser can be customized to accommodate various types of compressors, making it a versatile choice for different applications. The Air-Cooled condenser offers window fin and honeycomb fin options, catering to the diverse needs of customers with varying requirements for their cooling systems.
