

DD Series High-Efficiency Cold Air Distribution Unit for Refrigeration Systems in Freezing Environments

Our Product Introduction

for more products please visit us on coldroomunit.com

Basic Information

- Brand Name: DM
- Certification: CE ISO
- Model Number: DM-COOLER-DD
- Minimum Order Quantity: 1
- Price: 1000-100000
- Packaging Details: Customization
- Delivery Time: 20day
- Payment Terms: TT,L/C
- Supply Ability: 300000/Year

Product Specification

- Color: White
- Wind Flow: 30000m3/h
- Fin Type: Slotted Fin
- Cooling Capacity: 1.5-10kW
- Housing Material: Iron/galvanized Steel/stainless Steel
- Casing Material: Galvanized Steel
- Standard Power Supply: 380V-3phase-50hz
- Storage: Low Temperature Storage
- Highlight: **Freezing Environments Cold Air Distribution Unit**
, DD Series Cold Air Distribution Unit,
Refrigeration Systems Cold Air Distribution Unit

Product Description

Product Description:

The DD ceiling cooler represents a state-of-the-art cooling solution meticulously crafted for cold storage applications. Utilizing advanced refrigeration technology, it excels in providing exceptional cooling performance while ensuring high energy efficiency. Its unique ceiling design not only maximizes space efficiency but also ensures the even distribution of cold air throughout the cold storage space, thereby maintaining consistent low temperatures.

This cooler is a sought-after option for a broad spectrum of cold storage and warehouse facilities, especially in commercial and industrial environments where precise temperature control is crucial. Its remarkable efficiency and dependable performance make it perfect for preserving the freshness of perishable items and enhancing storage quality.

Features:

Efficient Cooling Performance:

DD type cooler adopts an efficient refrigeration system to ensure rapid cooling and maintain a constant temperature. It can provide a stable cooling effect even in environments with large temperature differences.

Energy-saving Design:

Equipped with an intelligent temperature control system and high-efficiency compressor, it can minimize energy consumption, help users save operating costs, and reduce energy waste.

Ceiling Installation:

The ceiling design saves the available space in the cold storage, avoids ground occupation, and is suitable for cold storage of different sizes.

Strong Durability:

The use of high-quality materials and anti-corrosion coating ensures the long-term stable operation of the equipment and can maintain a long service life even in humid and low-temperature environments.

Technical Parameters:

Model	Refrigeration capacity	Nominal area	Volume	Fan parameter			
				Number	Fan diameter	Power	Air volume

Applications:

Food Cold Storage:

Applicable to food storage and preservation, such as refrigeration of fruits, vegetables, meat, seafood, and other products. Ensure the freshness and quality of food by precisely controlling the temperature.

Pharmaceutical Cold Storage:

In the pharmaceutical industry, it is used to store products with strict temperature requirements such as medicines, vaccines, and blood products. DD-type coolers provide a stable low-temperature environment, which helps to ensure the effectiveness and safety of medicines.

Chemical Cold Storage:

Used to store chemical raw materials and special chemicals, especially some temperature-sensitive substances, to ensure that they are not affected by changes in ambient temperature.

Biotechnology and Laboratory Refrigeration:

Applicable to the storage of biological samples, experimental reagents, and scientific research materials, and the environment where the cold storage temperature needs to be precisely controlled.

Logistics Cold Storage:

In cold chain logistics, DD-type coolers can provide efficient and stable temperature control to ensure that food and medicines are kept at a suitable temperature during transportation and reduce losses.

Large Commercial Cold Storage:

Applicable to supermarkets, storage centers, and distributors that require large-scale refrigeration. Its high efficiency and energy-saving characteristics can help reduce operating costs.
