

High Temperature Slotted Fin Commercial Evaporative Air Cooler for Cooling in Large Commercial Spaces

Our Product Introduction

for more products please visit us on coldroomunit.com

Basic Information

- Brand Name: DM
- Certification: CE ISO
- Model Number: DM-COOLER-DD
- Minimum Order Quantity: 1
- Price: 1000-100000
- Packaging Details: Customization
- Delivery Time: 20day
- Payment Terms: TT,L/C
- Supply Ability: 300000/Year

Product Specification

- Evaporating Temperature: -35°C To -5°C
- Standard Power Supply: 380V-3phase-50hz
- Housing Material: Iron/galvanized Steel/stainless Steel
- Production Capacity: 5000000000pieces/Year
- Power Source: Electric
- Casing Material: Galvanized Steel
- Wind Flow: 30000m3/h
- Fin Type: Slotted Fin
- Highlight: **Slotted Fin Evaporative Air Cooler,
High Temperature Evaporative Air Cooler,
Large Commercial Spaces Evaporative Air Cooler**

Product Description

Product Description:

The **DD ceiling cooler** is a cutting-edge cooling solution specifically engineered for cold storage applications. It harnesses sophisticated refrigeration technology to deliver superior cooling performance and energy efficiency. The innovative ceiling design not only optimizes space utilization but also guarantees uniform distribution of cold air across the cold storage area, thus preserving consistent low temperature conditions.

This cooler is a popular choice for a wide range of cold storage and warehouse facilities, particularly in commercial and industrial settings where precise temperature regulation is essential. Its impressive efficiency and reliable performance make it ideal for maintaining the integrity of perishable goods and maximizing storage quality.

Features:

Efficient Cooling Performance:

DD type cooler adopts efficient refrigeration system to ensure rapid cooling and maintain constant temperature. It can provide stable cooling effect even in environments with large temperature differences.

Energy-saving Design:

Equipped with intelligent temperature control system and high-efficiency compressor, it can minimize energy consumption, help users save operating costs and reduce energy waste.

Ceiling Installation:

The ceiling design saves the available space in the cold storage, avoids ground occupation, and is suitable for cold storage of different sizes.

Strong Durability:

The use of high-quality materials and anti-corrosion coating ensures the long-term stable operation of the equipment, and can maintain a long service life even in humid and low temperature environments.

Applications:

Food Cold Storage:

Applicable to food storage and preservation, such as refrigeration of fruits, vegetables, meat, seafood, and other products. Ensure the freshness and quality of food by precisely controlling the temperature.

Pharmaceutical Cold Storage:

In the pharmaceutical industry, it is used to store products with strict temperature requirements such as medicines, vaccines, and blood products. DD-type coolers provide a stable low-temperature environment, which helps to ensure the effectiveness and safety of medicines.

Chemical Cold Storage:

Used to store chemical raw materials and special chemicals, especially some temperature-sensitive substances, to ensure that they are not affected by changes in ambient temperature.

Biotechnology and Laboratory Refrigeration:

Applicable to the storage of biological samples, experimental reagents, and scientific research materials, and the environment where the cold storage temperature needs to be precisely controlled.

Logistics Cold Storage:

In cold chain logistics, DD-type coolers can provide efficient and stable temperature control to ensure that food and medicines are kept at a suitable temperature during transportation and reduce losses.

Large Commercial Cold Storage:

Applicable to supermarkets, storage centers, and distributors that require large-scale refrigeration. Its high efficiency and energy-saving characteristics can help reduce operating costs.
