

Durable Industrial Portable Compressor with Double-Stage Compression and 50hz Frequency

Our Product Introduction

for more products please visit us on coldroomunit.com

Basic Information

- Brand Name: DM
- Model Number: DM-compressor
- Minimum Order Quantity: 1
- Price: \$2000~\$100000
- Packaging Details: Wooden Case
- Delivery Time: 30 Work Days
- Payment Terms: T/T
- Supply Ability: 1000000pcs/year

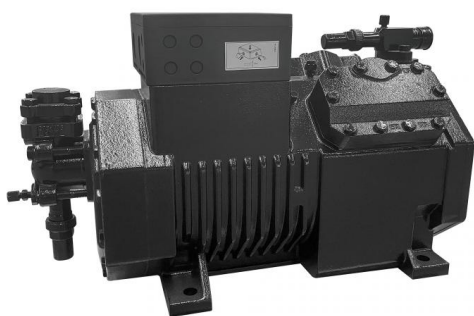

Product Specification

- Frequency: 50hz
- Refrigerant Type: Refrigerant
- Airflow: 500 CFM
- Voltage: 380 V
- Cooling Speed: 3 Speeds
- Type: Rotary
- Compress Level: Double-Stage

Product Description

Product Description:

Introducing our top-of-the-line Air Cooler Compressor, the ideal solution for your cold storage compressor needs. This Electric Air Compressor boasts a robust design and advanced technology to ensure efficient cooling performance in industrial settings. Operating at a frequency of 50Hz, this compressor is optimized for consistent and reliable performance. The use of Refrigerant as the refrigerant type enhances the cooling efficiency and ensures optimal temperature control for your cold storage requirements. Equipped with a Double-Stage compress level, this Air Cooler Compressor is designed to deliver superior cooling capacity for industrial applications. The double-stage compression mechanism enhances the efficiency of the compressor, providing powerful cooling capabilities to meet the demands of large-scale cold storage facilities. With an input power of 5.2KW, this Industrial Compressor delivers high-performance cooling while maintaining energy efficiency. The power input is carefully calibrated to ensure optimal cooling output without compromising on energy consumption, making it a cost-effective solution for your industrial cooling needs. As a testament to its quality and reliability, this Air Cooler Compressor comes with a generous 1-year warranty. This warranty reflects our confidence in the durability and performance of the compressor, providing you with peace of mind and assurance of long-term performance.

Applications:

When it comes to industrial compressors, the DM Air Cooler Compressor (Model: DM-compressor) is a top choice for various application occasions and scenarios. With its reliable performance and durable design, this compressor is suitable for a wide range of industrial settings.

The minimum order quantity is 1 unit, with a price range of \$2000 to \$100000 per unit. It is packaged securely in wooden cases for shipping and has a delivery time of 30 work days. Payment terms accepted include T/T, providing flexibility for customers.

The DM Air Cooler Compressor is a piston-type compressor with a cooling speed that offers 3 different settings, allowing for customized cooling options based on the specific requirements of the application. Its dimensions of 45*50*45cm make it compact yet powerful, suitable for various industrial setups.

With part numbers 4936218, 4933782, and 3969110, this compressor is versatile and compatible with different systems. Operating at a frequency of 50Hz, it meets the standard requirements for industrial operations.

With a supply ability of 1000000 units per year, the DM Air Cooler Compressor is readily available to meet the demands of industrial settings. Whether it is for manufacturing facilities, construction sites, or other industrial applications, this compressor offers reliable performance and efficient cooling capabilities.

DM-Piston/Reciprocating Compressor

DM piston/Reciprocating-type compressor is a robust and reliable solution designed for various refrigeration applications, especially in cold storage and industrial cooling systems. Utilizing a reciprocating mechanism, this compressor delivers consistent performance with high compression efficiency. Its durable cast iron structure ensures long-term operation under demanding conditions, while advanced valve technology enhances energy efficiency and reduces vibration. Suitable for both medium and low-temperature environments, the piston compressor is favored for its simple maintenance, stable operation, and adaptability to different refrigerants, making it an ideal choice for dependable refrigeration systems.

Customization:

Product Customization Services for the Air Cooler Compressor:

Brand Name: DM

Model Number: DM-compressor

Place Of Origin: China
Packaging Details: Wooden Case
Supply Ability: 1000000pcs/year
Voltage: 380 V
Type: Piston
Refrigerant Type: Refrigerant
Compressor Type: Piston
Keywords: Industrial Portable Compressor, Compressor System, Cold Storage Compressor

Support and Services:

Our Product Technical Support team for the Air Cooler Compressor is dedicated to assisting customers with any technical issues or questions they may have regarding the product. Our team of experts is available to provide troubleshooting guidance, product information, and support to ensure optimal performance.

In addition to technical support, we also offer a range of services for the Air Cooler Compressor product. These services may include maintenance, repairs, and installation assistance to help customers get the most out of their product. Our goal is to deliver reliable and efficient support to meet the needs of our customers.
